ZEPF Uni-Grip Instrument Holder

ZEPF Uni-Grip

by Dr. Engesser

The new **ZEPF** Uni-Grip Instrument Holder allows to insert and, above all, to remove rotating instruments from the contra-angle handpiece / from the turbine in a very simple way.

Just when inserting / changing e.g. sharp ground tungsten carbide burs, quite often the dentist damages his gloves during the treatment. Taking these difficulties into account, **HELMUT ZEPF** has developed an easy, but effective solution. The **ZEPF** Uni-Grip is a simple holding instrument, provided with silicone inserts to safely prevent a slipping off.

The instrument contributes to the safety at work in a cost-effective, easy and efficient manner.
